

HTML

- Stands for Hypertext Markup Language
- Used to display content on a web page
 - Uses tags with angle brackets to hold and display different pieces of content

Page Structure

- Two major sections
 - Head
 - Contains metadata
 - Body
 - All content that is seen on a page
- HTML is made up of tags
- Each tag has a specific name and function
- Most tags have opening and closing tags

Tag Attributes

- Some tags need more information in order to work
- Example:
 - ``

Important metadata tags and attributes

- Tags
 - `<title></title>`
 - `<meta name = "?" content = "?">`
 - `<link rel = "?" href = "?">`
- Attributes
 - `alt = "description"`
 - `lang = "?"`

Accessibility

- Make sure our websites are accessible to as many people as possible
- Accessibility considerations
 - Low-bandwidth users
 - Visually impaired users (screen readers)
 - Low english proficiency users (content displayed must be understandable)
